SOUND GENERATORS

Memory decoders

Scroll adder
The CPU reads from it when INTSHOW is low.
The game reads using A=200 to 2FF in a loop

Video RAM

Watchdog

Object RAM 1/2 -X position -code

Object RAM 2/2 -Y position -Attributes

Object ROM 15b code

Tile ROM address
A20 --> Y2:0
A3 --> !HN
A13:4] --> Tile code (10 bits)

Tile attributes:
3:0 -> palette
4 --> hflip
5 --> vflip
7:6 --> tile code MSB

Tile palette LUT

low selects the object pixel to be displayed

Layer mux

shift register

Double line buffer

line buffer

Object palette LUT

COMPBLANK color set to zero during blanking
